

KCD Software v25

The design to manufacture software solution for cabinet and closet professionals.

What's New in KCD Software - Version 25!

Version 25 represents the continued evolution of KCD Software. With a focus on design, efficiency, and presentation, this release introduces new tools and enhancements designed to support modern cabinet and closet professionals. Explore what's new in Version 25 below!

HD Doors

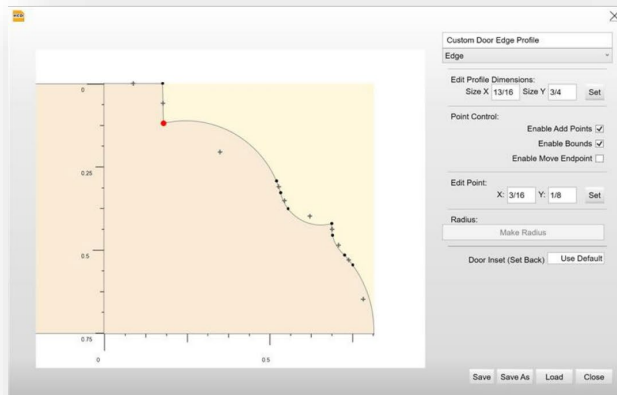

Bring your designs to life with enhanced depth, shadow realism, and true-to-life door detailing. HD Doors provide crisp visuals for presentations and customer approvals. Choose from a library of pre-created HD door styles for fast, professional results or design your own custom profiles to match any aesthetic or customer request. Enhanced visuals help communicate your vision more clearly to clients with more defined shapes, on your door and drawer front panels and on your inside and outside edges. Whether you are creating classic styles or a one-of-a-kind design, HD Doors gives you the visual power to showcase them like never before.

Door Profile Editor

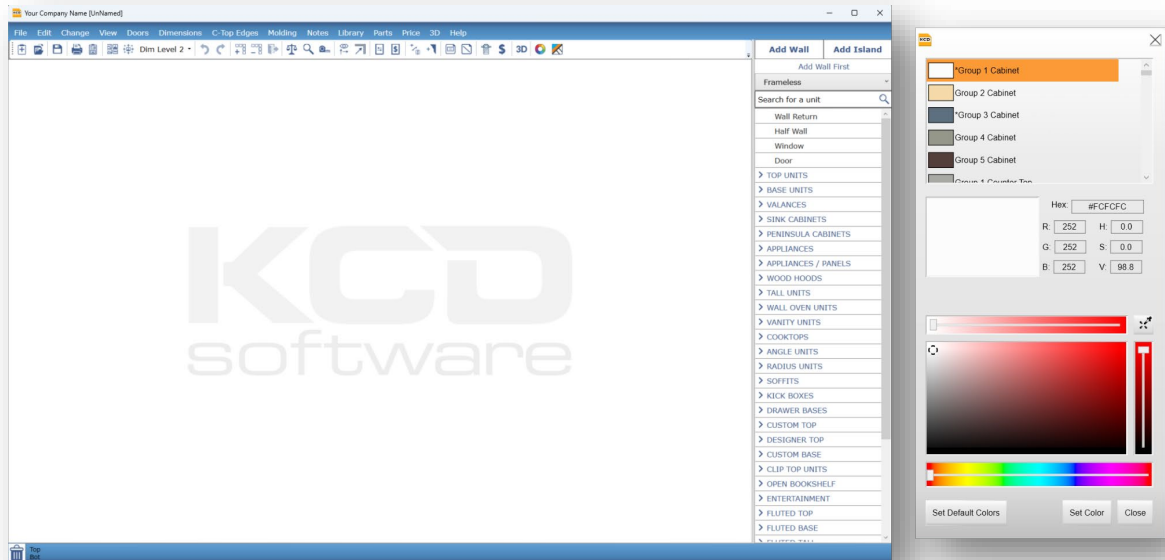

Create and display the Custom Door Profiles your customers will be receiving. Unlock a new level of design flexibility with the Door Profile Editor, which is built to work seamlessly with our new HD Doors. Present your complete design with the door profiles your customers want. Choose from traditional built-in Door Profiles or create your own one-off Custom Profiles. Sharper door details will produce superior finished renderings, to visually entice your customers. Designed for both speed and creative freedom, the Door Profile Editor gives you the tools to design doors the way you need them – detailed, custom, and beautifully accurate.

Enhanced Interface & Color Selector

A modernized, streamlined interface paired with a powerful new Color Selector makes adjusting your palette faster, more accurate, and intuitive. Revamped color selection interface with a modern, user-friendly layout helps to enhance speed, accuracy, and creative control. Use the eye dropper tool to select the colors you want from other images and apply them directly to your designs. Easily choose, apply, and adjust colors to match client preferences or explore new ideas! Whether you are fine-tuning a single cabinet or reimagining an entire space, these enhancements help you design with confidence and flexibility.

Updated 3D Objects & Appliances

Enjoy a refreshed library of high-quality 3D objects, brand new appliances, LED lighting options, and new countertop designs. Bring your designs to life with new and enhanced appliances including stoves, refrigerators, dishwashers, and more – with greater detail and realism! An expanded library of indoor and outdoor accessories, including new lighting options, helps to set the perfect scene. This new improved visual accuracy helps clients better visualize their finished project. Seamlessly integrates into your existing designs and workflows. From kitchens to closets to patios, these new objects make your presentations more polished, complete, and impactful.

New Surface Materials and Cambria® Quartz Designs

The addition of Built-in Cambria® Quartz Designs brings their latest and greatest surfaces to you. Choose from a range of premium countertop textures for enhanced renderings that impress clients and elevate your visuals. Additional flooring and backsplash surfaces bring consistency across the entire design, helping clients better visualize materials, finishes, and the final outcome.
