

v10

KCD CABINET/CLOSET VERSION 10 UPGRADE

**We're very excited about Version 10 –
An upgrade that will powerfully and competitively carry you into the future.**

The release of v10 stays true to our original vision – a vision that sets us apart: To create custom software that works exceptionally well for the user, is easy-to-use right off the bat, and has amazing depth and versatility where and when you want it.

You talked. We listened.

Version 10 brings many new powerful features that allow you to customize your designs in more detail and turbo-charge your cabinet and closet design, price and build process.

We've also included innovations that give you **greater flexibility** for **best practices** with **workflow options** that provide **highly-competitive solutions** for meeting today's challenges.

That means **you can expect your upgrade to pay for itself in a very short amount of time – and for your happiness and profitability to increase:**

- **Designer v10 Upgrade** (includes Full Tech Support): \$495
- **Pricer, Builder & Workshop v10 Upgrade** (includes Full Tech Support): \$695
- **CNC Commander v10 Upgrade** (includes Full Tech Support): \$1695

Browse the following pages for a full list of our new v10 features. Then give us a call to ask questions and order your own v10 Upgrade.

Thanks for using KCD Software. We look forward to hearing from you,

The KCD Software Team

PS. **KCD Upgrades are always optional.** Whether your software is up-to-date or you haven't upgraded in 17 years, we're here to help you make a smooth transition. Call 508-760-1140 today to upgrade to Version 10 and benefit immediately from a faster, better version of the software you already use.

v10

KCD CABINET/CLOSET VERSION 10 UPGRADE

Design, Price & Build using your Touch Screen

...all the way through production!

A simple click on "Touch Screen Mode" as you launch Version 10 and your full program is now optimized for use on a touch screen Computer or PC Tablet*. No more being tied to your office to design, price or build your custom cabinetry and closets.

Job Site Pics with Hand-drawn Notes

Using a Windows 8.1 Tablet, you can take pictures, import photos and draw or make notes right on the photos. Everything saves in one place with your design file for great organization.

Take KCD Software onsite, to your client or out into the shop. Work on designs while you're waiting in the car or traveling. It gives you a lot more flexibility – and your clients will love it.

Cloud-friendly

Save files from your Computer or PC Tablet to your Cloud account for easy file sharing with your Production Team or Customer.

[Watch Video](#)

* Tablet spec's required: Windows 8 Pro tablet with Windows 8.1 operating system, standard USB port, camera

v10

KCD CABINET/CLOSET VERSION 10 UPGRADE

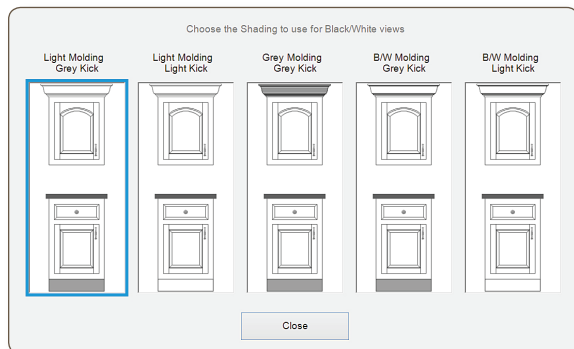

New Custom Design Features

Customize Door & Drawer Fronts, Panels, Mullions & more

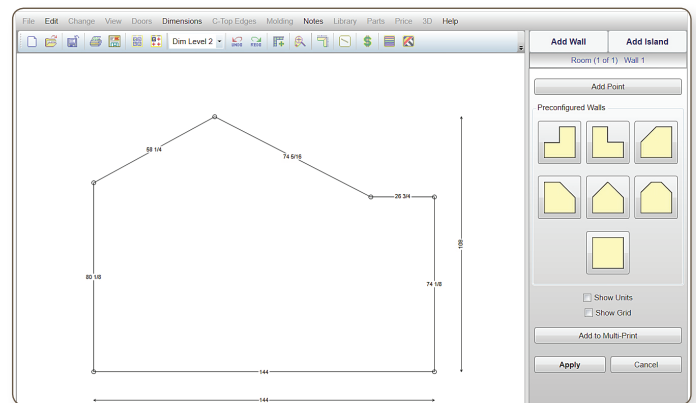

Edit the width of your door stiles and rails. Change the width or height of the panels in multi panel doors, or change the width of your mullions, or the thickness of the bead and more. You can change these dimensions on all the doors or just one door in a job. The parametric changes are reflected in your design and automatically adjust the cut list output for accurate cut sizes.

Shading Options for B&W Views

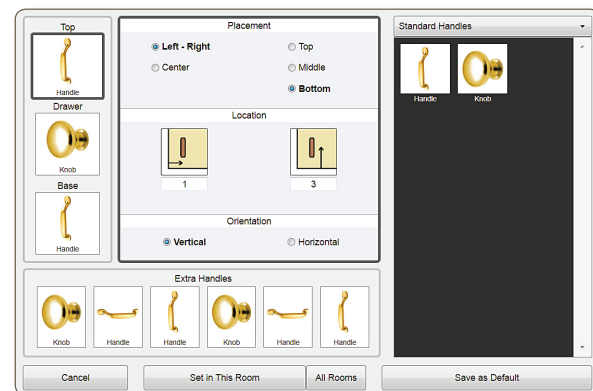

Utilize multiple shading options for your black and white drawings.

Customize Wall Shapes

Elevation View. Choose from preconfigured wall shapes and modify your details or add points to create a unique custom wall shape.

Customize Door Knobs and Handles

Knobs and Handles look real with more choices. Import your own through Import 3D File. Import a DWG (autocad), .dxf or .stl file as a handle and KCD will add it to your choices of door and drawer hardware.

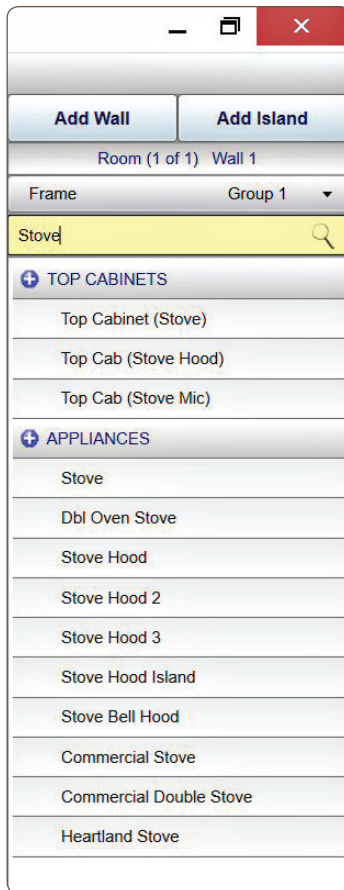

v10

KCD CABINET/CLOSET VERSION 10 UPGRADE

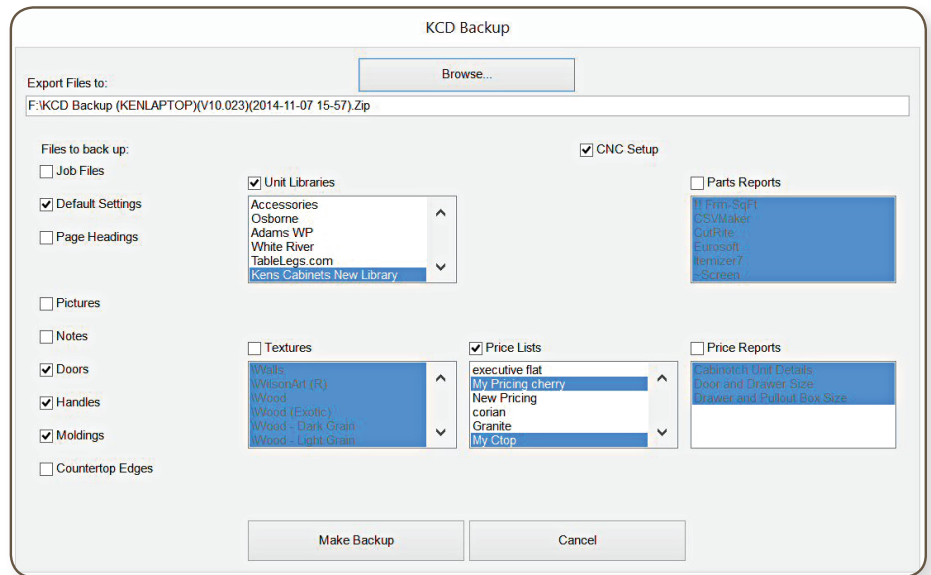

You talked. We listened.

Quick Search for Unit

Find items in a fraction of the time with this handy Search feature in your menu section (below).

Back-up Restore

Control your file sharing and back-ups. Select exactly what you would like to back-up then restore it on another computer. More than just a back-up, this feature lets you easily distribute specific files to others in your business.

Show Shelves

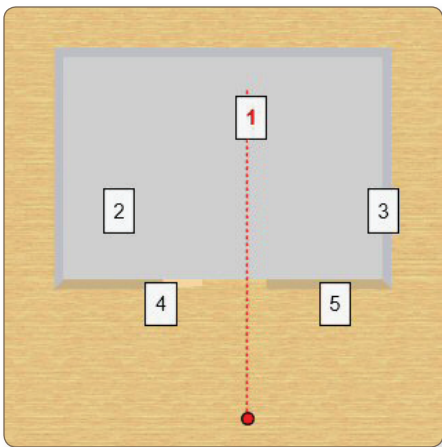

Show or hide shelf lines on your elevation view. See your shelves through your doors.

v10

KCD CABINET/CLOSET VERSION 10 UPGRADE

You talked. We listened.

3D Easy Nav

Select **Hide from Drawing** and view a floor plan Image with your position and view direction along with the wall numbers for reference (above).

Default Sizes

Set a default for any size on any unit.

Quickly Swap out Units

Your design is complete but once again your customer would like you to change that 3 drawer base to a 4 drawer base. Simply right mouse click on the unit number and then right mouse on the 4 drawer in your unit menu. Select replace and you're done. (available in Frame, Frameless and Overlay Frame libraries only).

Size your saved Custom Units when Placing

Select a custom unit you saved and change the width as needed when you place it on your design. No more placing your custom designed unit as is and modifying the width afterward.

Rotate Text for Readability

Automatically rotate dimensions and unit codes Vertical and Horizontal. This feature creates necessary space to read dimensions.

Designer-friendly Parameters for Production

Set your values in metric (actual size) and let designers work in inches. Great for 32mm systems and production. Make an Allowed Sizes List for any value on any unit in your KCD Library (example: Height, width, depth, door and drawer front sizes, etc.) Now the unit will be set with these dimensions based on the information in the Allowed Sizes List.

Set Font Preferences

Easily set fonts for dimensions, notes and headings permanently in the Fonts menu.

Multi-Print Features

Show/hide border on all Multi-Print images on current page (right-click menu). Set Multi-Print images to show without borders by default. Crop and Rotate multi-print pictures. Adjust brightness and contrast. Add notes and hand drawings to any Multi-Print image.

KCD CABINET/CLOSET VERSION 10 UPGRADE

KCD and Cabinotch® : Revolutionary Technology

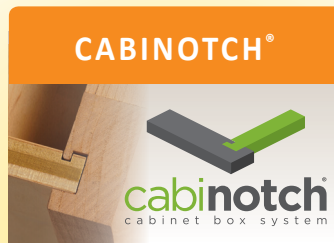

The Cabinotch Design Library within KCD Designer allows you to create custom face frame cabinetry with precision parts cut by award-winning Cabinotch® for high-quality integration into your custom woodworking process.

*Easy
Custom
Design
+
Powerful
Building
Options*

TRADITIONAL

Impressive 3D Designs, Pricing and accurate Cut lists with KCD Software's Cabinet Workshop. Free technical support and training.

Send KCD designs directly to Cabinotch for custom face-frame cabinets shipped straight to you. The revolutionary Cabinotch Design Library is included in KCD Software. Get started and register today.

CNC

Go straight from 3D custom design to CNC with KCD Commander. It's easy, fast, reliable and won't need a special Machine Operator to run.

KCD Software: Best Production Options in the Industry

Version 10 brings cabinet designers and cabinet makers a new way to design, price and build, using Cabinotch.® It's a great way to watch

your productivity take a quantum leap. KCD Software's unique design and cabinet building technology combined with the award-winning

Cabinotch® custom frame cabinetry, brings a new highly competitive, hassle-free production option to custom cabinet makers.

Design with KCD, Price and Custom Build with Cabinotch.®

When a Cabinotch design is complete, a menu option sends the file to Cabinotch for a price quote and delivery date. The order is processed

and precision sized face frame cabinets are shipped directly to the shop, for assembly and custom finishing. This smooth and easy-to-use

process allows custom cabinet makers more time to focus on creating beautiful custom details rather than cutting the parts for the boxes.
